Restores burned grass from pet urine and gets rid of pesky brown spots. Bring the green back to your yard!

Restaura el césped quemado por la orina de las mascotas y se deshace de las molestas manchas marrones. ¡Devuélvale el verde a su césped!

How Revive Dog Spot Treatment Works

A treatment of Revive Dog Spot Treatment eliminates troublesome yellow and brown spots caused by recent pet urine and feces. You can use this product as a spot treatment or treat larger areas where the grass is showing brown areas. Revive Dog Spot Treatment will help all pet spots, is safe to use on all grass types and will not burn even in hot summer temperatures. Revive's scientifically superior product is composed of organic-based materials, wetting agents, surfactants and other ingredients. No raking involved, just spray, soak and walk away until the lawn is dry.

Directions For Use

Shake the container lightly before using. Attach ready spray nozzle to water hose. Turn water on, open valve and hold nozzle approximately 4" above each burn area and spray each spot for 10-20 seconds depending upon the size. After soaking each spot flush the treated area with water for another 10-20 seconds. Most areas show recovery in 14 days. If you don't see visible improvements in 14 days, treat the area again.

Agite suavemente el envase antes de utilizar el producto. Conecte la boquilla rociadora a la manguera. Abra el grifo, abra la válvula y sujete la boquilla a una distancia de aproximadamente 4 pulgadas sobre cada zona quemada y rocíe cada mancha durante 10 a 20 segundos, según las dimensiones. Después de empapar cada mancha, enjuague la zona tratada con agua durante otros 10 a 20 segundos. La mayoría de las zonas se recuperarán en el transcurso de 14 días. Si no ve mejoras visibles a los 14 días, vuelva a tratar la zona.

Application Rate: Treats 100-150 spots or 2,000 sq ft if applied on a broadcast basis.

Proporción de aplicación: Sirve para tratar entre 100 y 150 manchas o 2,000 pies² si se aplica al voleo.
